(54) Title: PIPERIDINE QUINOLYL PROPYL DERIVATIVES, PREPARATION METHOD AND COMPOSITIONS CONTAIN-
ING SAME

(54) Titre: DERIVES DE LA QUINOLYL PROPYL PIPERIDINE, LEUR PRÉPARATION ET LES COMPOSITIONS QUI LES
CONTIENNENT

(57) Abstract: The invention concerns piperidine quinolyl propyl derivatives of general formula (I) wherein : R₁ is H or halogen, or OH, R'₁ is H, or may represent halogen when R₁ is also halogen, and R⁰ is H, or R₁ and R⁰ together form a bond and R'₁ is H. R₂ is a carboxy, carboxymethyl or carboxy-2-ethyl radical, and R₃ is C₁-C₆ alkyl substituted with 1 to 3 substituents selected among OH, halogen, =O, COOH, alkyloxycarbonyl, alkyloxy, alkylthio or among a phenyl, phenylthio or phenylalkylthio radical which can themselves bear 1 to 4 substituents [selected among halogen, OH, alkyl, alkyloxy, trifluoromethyl, trifluoromethoxy, COOH, alkyloxycarbonyl, CN, acetamido or NH₂] or among cycloalkyl, cycloalkylthio (3 to 7 members), or among aromatic heterocyclyl or heterocyclylthio (5 to 6 members) comprising 1 to 4 heteroatoms selected among N, O or S and optionally substituted themselves [with halogen, OH, alkyl, alkyloxy, CF₃, OCF₃, =O, COOH, alkyloxycarbonyl, CN or NH₂], R₄ is propargyl substituted with phenyl which can itself bear 1 to 3 substituents [selected among halogen, OH, alkyl, alkyloxy, CF₃, OCF₃, COOH, alkyloxycarbonyl, CN or NH₂], or substituted with a cycloalkyl radical comprising 3 to 7 members or substituted with aromatic heterocycle (5 to 6 members) comprising 1 to 4 heteroatoms selected among N, O or S and optionally substituted itself [with halogen, OH, alkyl, alkyloxy, CF₃, OCF₃, =O, COOH, alkyloxycarbonyl, CN or NH₂], or substituted with a cycloalkyl radical comprising 3 to 7 members or substituted with aromatic heterocycle (5 to 6 members) comprising 1 to 4 heteroatoms selected among N, O or S and optionally substituted itself [with halogen, OH, alkyl, alkyloxy, CF₃, OCF₃, COOH, alkyloxycarbonyl, CN or NH₂], or R₃ represents cinnamyl or 4-phenylbuten-3-yl, or R₂ is -CH₂OII, alkyloxycarbonyl, alkyloxy, alkyloxycarbonylmethyl or alkyloxycarbonyl-2-ethyl and R₃ is C₁-C₆ alkyl substituted with phenylthio which can itself bear 1 to 3 substituents [selected among halogen, OH, alkyl, alkyloxy, CF₃, OCF₃, COOH, alkyloxycarbonyl, CN or NH₂], with cycloalkylthio comprising 3 to 7 members, or with aromatic heterocyclylthio (5 to 6 members) comprising 1 to 4 heteroatoms selected among N, S or O and optionally substituted itself [with halogen, OH, alkyl, alkyloxy, CF₃, OCF₃, =O, COOH, alkyloxycarbonyl, CN or NH₂] or R₃ is propargyl substituted with phenyl, which can itself bear 1 to 3 substituents [selected among halogen, OH, alkyl, alkyloxy, CF₃, OCF₃, COOH, alkyloxycarbonyl, CN or NH₂], or substituted with cycloalkyl comprising 3 to 7 members or substituted with an aromatic heterocyclyl with 5 to 6 members comprising 1 to 4 heteroatoms selected among N, O or S and optionally substituted itself [with halogen, OH, alkyl, alkyloxy, CF₃, OCF₃, =O, COOH, alkyloxycarbonyl, CN or NH₂], and R₄ is C₁-C₆ alkyl, (C₃-C₅) alkenyl-CH₂- or alkynyl-CH₂
